

CREATABY QUICKSTART GUIDE

Your first project in 10 minutes.

A calm, step-by-step walkthrough that takes you from a blank page to a real, sellable asset you can launch today — no experience needed.

CREATABY · Turn what you know into something you can sell.

You don't need a big idea, a fancy setup, or hours of free time. In the next ten minutes you'll pick a path, follow a few guided steps, and walk away with your very first piece of content ready to use. Grab a coffee and let's build.

BEFORE YOU START · ~1 MINUTE

Get set up

0:00 – 1:00 Create your free account

Go to Creataby and enter your email. We'll send you a magic link — no password to remember. Click the link in your inbox and you're in. The Free plan gives you 2 generations a month and 1 active project, so you can start without a credit card.

THE WALKTHROUGH · ~9 MINUTES

Build your first asset

1:00 – 3:00 Pick your path

After signing in, answer a few quick questions. Creataby recommends one of three paths based on your answers:

- **Fast Cash** — package a skill into a simple service and land your first paying client this week.
- **Digital Product** — turn what you know into an ebook, workbook, or template you can sell over and over.
- **Faceless Affiliate** — recommend proven offers and earn without ever showing your face.

Not sure which one fits? Type your situation into the "Not sure?" box and Creataby will pick the fastest path to your first result.

3:00 – 4:00 Land on your dashboard

Your path opens as a clear checklist of steps — one simple action per screen. There's no blank page and no guessing. The dashboard always shows your next step, so you never have to wonder "what now?"

4:00 – 5:00

Open Step 1 and read your mission

Each step has a short "Your Mission" card that explains exactly what you're creating and why it matters. Read it once — it takes about a minute — then scroll down to the input box.

5:00 – 7:00

Fill in the box and press "Guide Me"

Type a sentence or two about your idea, skill, or audience. Don't overthink it — plain words are perfect. Then press the **Guide Me** button. Creataby writes the copy, outline, or script for you in seconds, in a friendly, jargon-free voice.

7:00 – 8:30

Review, tweak, and save

Read what Creataby produced. Like it? Press **Save All to Workspace** to keep it. Want a different angle? Press **Redo** for a fresh version. You can edit anything — this is your starting point, not a locked-in answer.

8:30 – 10:00

Mark complete and preview what's next

Press **Mark Complete**. You'll see a quick celebration and a preview card for your next step. That's it — you've just created your first asset in Creataby. Keep going step by step whenever you have a few minutes, and your project builds itself.

Tips for the best results

- **Be specific.** "Busy parents who want quick dinners" beats "everyone." The more real your input, the sharper the output.
- **Use plain language.** Write like you're texting a friend. Creataby handles the polish.
- **Ask Reggie anything.** The "Ask Reggie" button is on every screen — a friendly assistant that explains steps and suggests answers you can drop straight in.
- **Don't chase perfect.** Save a "good enough" version now and refine later. Momentum beats perfection.
- **Export when ready.** Send your finished work to PDF, Stan Store, Gumroad, Systeme.io, Carrd, or ClickFunnels with one click.

QUICK REFERENCE

Your 10-minute checklist

- ☐ Sign up with your email and click the magic link
- ☐ Answer the quick questions to pick your path
- ☐ Open Step 1 and read your mission
- ☐ Type your idea and press "Guide Me"
- ☐ Review, tweak, and "Save All to Workspace"
- ☐ Press "Mark Complete" and preview your next step

What to do next

- Keep working through your path — each step adds another piece of your launch.
- When you hit the free limit, upgrade to **Creator** for unlimited generations, or **Creator Pro** for unlimited projects.
- Explore the other paths once your first project is live — every plan includes all three.
